TECHNOLOGIES INTERNATIONAL
Leading the world in pre-hospital burn care

BURN DRESSINGS

Our Water-Jel Burn Dressings stop the burning process, reduce burn progression, cool the skin, protect against airborne contamination, and help relieve pain all in one simple step, with no special training and no pre-cooling required. These sterile dressings are soaked in a water-based/water-soluble, bacteriostatic and biodegradable gel and are nonadherent to burn injuries. They are composed of a medical grade, nonwoven polyester carrier. All of our dressings can be used on superficial, partial and full thickness burns. Water-Jel Burn Dressings are available in six convenient sizes and have a 5-year shelf life.

FIRE BLANKETS

Water-Jel Fire Blankets offer one of the quickest, easiest and most direct methods of administering emergency first aid burn care. When placed on a victim, our gel-soaked blankets cool the skin, protect against airborne contamination, and help relieve pain all in one simple step, with no special training required. They can also be used to extinguish flames on a victim and smother small fires.

Our Water-Jel Fire Blankets are composed of a 100% worsted-wool carrier with an intercellular weaver capable of absorbing up to 13x its own weight. The wool is soaked in a water-based, water-soluble gel that is bacteriostatic and biodegradable. The Water-Jel Fire Blankets are available in three sizes and are packaged in high-visibility, orange, wall-mountable canisters or pouches.

BURN JEL EU

Unlike petroleum-based products, which can trap heat in the skin, Water-Jel Burn Jel EU actually draws the heat out of the burn and begins dissipating it on contact. Based on the same water-based gel technology used in our Fire Blankets and Burn Dressings, Burn Jel EU offers fast, cooling relief from the pain of minor burns. Available in unit-dose packs, squeeze bottles and a pump dispenser.

BURN KITS & BURN STATIONS

Water-Jel Burn Kits and Emergency Burn Stations are available in a variety of designs to better meet the different work environments of first responders, safety managers, and medical professionals. Developed in collaboration with paramedics around Europe, these burn kits and burn stations offer different combinations of our Burn Dressings, Burn Wrap/Fire Blankets, and Burn Jel to meet any burn emergency. All Water-Jel Burn Kits come in handy transport and storage bags. All Water-Jel Emergency Burn Stations are manufactured from durable, wipe-clean plastics.

Water-Jel Ambulance Burn Kit:

Developed in cooperation with ambulance services across Europe to match measurement proposals, the Ambulance Burn Kit supplies the rescuer with a maximized set of Water-Jel dressings and a blanket.

CONTENT: Ambulance Burn Kit
